

10 Ways We Solve Your Search Challenges

Expert Online Searches

From the simplest to the most complex, from patent to non-patent literature, our searches are always performed by experienced searchers in each technology area.

Technology Search Specialities

Comprised of the top information experts in their field, our search practices include Pharmaceutical, Biotechnology and Biosequence, Chemical Structures, Medical Device, Polymer, Semiconductor, and more.

Biomedical Searches

From FDA/EMEA searches to business and competitor intelligence searches and analysis, our Biomedical practice team offers the most comprehensive suite of services in the industry.

Patent Analysis & Mapping

Leverage the best search results in the industry to uncover the trends, gaps, and overlaps in patent coverage that drive effective R&D strategy with our patent analysis and mapping solutions.

Patent Updates and Watches

Stay instantly up-to-date on patent activity and status changes with our Patent Alert services.

Manual Searches Worldwide

Only TPR can offer original language, full-text document reviews in key countries around the world, including Japan, China, Taiwan, Russia, Israel, and the European Union.

Validity Ultimate™ Searches

For projects that demand the deepest level of information discovery possible, we offer Validity Ultimate™ - the ultimate in validity case research. Our team of international searchers leverage their industry-leading expertise to provide a tailored, systematic and incisive search that covers everything from worldwide native-language libraries and online searches to obscure “gray” literature.

USPTO Manual Searches

Reliable, cost effective searches with a guaranteed turnaround time.

Design Searches

In-depth design patent searches available worldwide, including Japan, China, Taiwan, Russia, Israel, and the European Union.

USPTO Accelerated Examination Searches

Let TPR help you streamline the patent prosecution process and get your patent to the market sooner.
